RE: REVISED Approval of SATAjet 3000 RP Digital/ SATAjet 3000RP Compliant Spray Guns for Butte County

The Butte County Air Quality Management District (District) has completed our review of your request regarding the SATAjet 3000 RP and SATAjet 3000 RP Digitial Spray Guns use in Butte County. The results of the transfer efficiency testing indicate that the SATAjet 3000 RP Digital / SATAjet 3000RP are capable of achieving equivalent or better transfer efficiency than high-volume, low-pressure spray equipment. The District approves both SATAjet 3000 RP Digital and SATAjet 3000RP spray guns for operations subject to Rule 235—Requirements for Vehicle and Mobile Equipment, under Section 3.5.5. This approval is subject to the following conditions:

- 1. A written notification will accompany each SATAjet 3000 RP Digital / SATAjet 3000 RP Compliant Spray Gun sold or distributed for use with the District that states the spray gun is only approved for application of coatings subject to District Rule 235.
- 2. The maximum allowed pressure to the Compliant Spray gun is limited to 35 psig and this requirement is included in the notification.
- 3. SATA Gmbh & Co. KG Spray Guns sold or distributed within the District shall include a SATA air micrometer with gauge 0/845 (product number 27771) or SATA adam digital air micrometer with gauge (product number 130146) with each SATAjet 3000RP that clearly identifies the maximum allowable air pressure and notification includes that the use of this part in good working order is required during actual operation.
- 4. Any modification to the spray gun design invalidates this approval unless such modification is approved by the District.

If you have any questions regarding this approval, please contact me at (530) 891-2882.

Sincerely.

David I Luck

Air Pollution Control Engineer
